Navigation & Product Discovery

Finding your ideal device is quick and intuitive using our various search and filter tools.

- Search Engine: Located at the top of every page. Enter the name, brand, or specific model (e.g., "ThinkPad X1") to find available devices instantly.
- Navigation Bar (Navbar): Use the top menu to jump between Home, Products, Compare, Shopping Guide, and Services.
- Homepage Sidebar: On the left side of the home page, use the "Browse Categories" sidebar. This allows you to filter specifically for Laptops, Desktops, Storage, or Mice to narrow down your search fast.
- Filters: On the Products page, use the price range sliders and brand checkboxes to find a device that fits your budget.

Interactive Product Features

Once you find a device, you have several ways to interact with it:

- **Compare Feature:** Not sure which one to pick? Use the Compare button on a device. You can select multiple devices to see their specs side-by-side to make an informed decision.
- **Enquire (WhatsApp Integration):** Have a specific question? Click the Enquire button. This will automatically open your WhatsApp with a pre-initialized message regarding that specific device, connecting you directly with our sales team.
